Languages: Portuguese (Native), English (Upper-Intermediate – EF SET B2, 62/100)

Professional Summary

Motivated professional with a strong foundation in data analysis, process automation, and cloud computing.

Currently pursuing **AWS Cloud Practitioner certification** and English fluency to transition into international remote roles.

Experienced in building automation tools using Python, Google Sheets, and Apps Script, improving operational efficiency for corporate teams.

Proactive, analytical, and focused on continuous improvement through technology.

Core Skills

- Languages & Tools: Python, SQL, JavaScript, Power BI, Google Apps Script, Streamlit
- Cloud & DevOps: AWS (in progress), Supabase, GitHub
- Automation: Web scraping, API integrations, ETL pipelines, process optimization
- Data Analysis: Visualization (Power BI, Sheets), statistical insights, reporting automation
- AI & ML: Basic ML models, RAG (Retrieval-Augmented Generation), generative Al agents
- Soft Skills: Communication, adaptability, attention to detail, remote collaboration

Professional Experience

Backoffice & Data Automation Projects (Internal SaaS Initiative)

Private Corporate Environment — Brazil (2024–Present)

 Developed a digital management system (Micro SaaS) to optimize internal workflows for a 25-person department.

- Designed a client management platform (no banking transactions) to reduce tool redundancy and legal risk.
- Implemented Google Sheets + Apps Script automation, improving team efficiency by 40%.
- Created an internal proof-of-concept for legal process automation, preventing high-cost litigation.

FIIs Monitor – MVP Project (Personal Project, 2025)

- Built a web app integrating financial data (BRAPI.dev) to monitor Brazilian Real Estate Funds (FIIs).
- Deployed the MVP using Vercel + Supabase, gaining experience in product deployment and scalability.
- Designed dashboards and API connections to display real-time market insights.
